

Greenlads Payment Services is now offering 4-30 Pricing

Our 4-30 pricing model charges a flat 4% fee on each transaction, accompanied by a \$30.00 monthly fee. This plan is mainly intended for Mail Order/Telephone (MOTO) merchant accounts but may be modified for Internet, in-person, or omnichannel in certain situations. Businesses have three options to manage the plan's costs.

Option #1: The customer pays the 4% fee per transaction, and the business pays \$30 per month. This option helps you minimize your direct transaction costs.

Option #2: The business pays the flat fee of 4% per transactions, in addition to the monthly fee of \$30 per month. A straightforward approach for your accounting.

Option #3: The business is responsible for paying 1% of the flat fee in addition to a monthly fee \$30. The business then applies a surcharge of the remaining 3% on the customer's card transaction.

The Monthly Fee covers PCI Compliance, Next Day Funding, and Payment Gateway Access.

Please note that this is a fully underwritten merchant account, not an aggregator merchant account.
